

# SnapBrite SR80K-6W-120

120V Direct Connect AC LED MODULE

80mm dia. • 6 Watt • 455lm • 120V

SINGLE-CCT or WARM ON DIM
STANDARD THD DIMABLE MODULE

**Technical Data Sheet** 

### **Direct Connect AC LED lighting technology**

## SnapBrite™ SR80K-6W-120

## Description

SnapBrite high voltage AC LED modules are fast, easy and reliable LED light sources for lighting OEMs in need of LED solutions that offer direct AC line voltage connectivity.

Lynk's patented AC LED technology eliminates the requirement for an expensive, bulky and failure prone AC – DC power supply or driver. Delivering efficiency, reliability and a high power factor, SnapBrite modules can be used by lighting manufacturers in many types of fixture as an effective replacement for energy hungry incandescent or CFL lamps. Additionally, the modules will dim with many popular leading and trailing edge phase cut dimmers.

Unlike other AC LED light sources, these SnapBrite modules offer a very unique but optional Warm-On-Dim feature that can change CCT from cooler to warmer as the dimming level changes. This mimics the way a traditional light bulb or halogen lamp becomes warmer to look at as the light level reduces. WOD is a great feature for hospitality and residential applications.

Lynk Low THD Technology can provide under 20% ATHD and a power factor of better than 0.97 for applications demanding minimal EMC disturbance.

Look for the Lynk Labs name or this private label mark to ensure you are always backed by Lynk Labs high quality AC LED technology, IP, and reliability. Lynk Labs - Your AC LED Experts!

## **Features**

- 120V Direct Connect No Drivers/PSU's
- Lower Cost Higher Reliability AC LED Module
- Dimmable
- Work with most existing AC Dimmers
- High Efficiency
- ➤ High Power Factor >0.97
- ➤ Low THD <20%
- Significant Energy Savings
- Long Operating Life
- Reliable, Fast & Easy

## **Applications**

- Recessed and Flush mounts,
- Outdoor Flood
- Ceiling Fans,
- Pendants
- Indoor/Outdoor General line voltage Illumination
- Ideal for commercial, hospitality and residential

### 9.Packaging

LED Modules will be packaged in trays for primary protection.

According to the total delivery amount, cardboard boxes will be used to protect the Trays of LED Modules from mechanical shocks during transportation.

The boxes are not water resistant and therefore must be kept away from water and moisture.

### 10. Reliability and Average Lumen Maintenance

Before releasing new products the manufacturer puts a representative product sample set through an entire suite of qualification tests, including the most stressful test for high power LEDs, the Wet High-Temperature Operating Life (WHTOL) test at 85°C/85%RH for 1000 hours at the specified operating current.

LED lifetime has been extrapolated based on the accumulated operating and accelerated aging data. Based on this data, the manufacturer projects that the LED products will deliver, on average, 70% lumen maintenance at 50,000 hours of operation at the specified operating current, provided that the case temperature is maintained at or below 80°C.

### 11. Moisture Sensitivity

The module can operate for up to 1000hrs at 85 °C and 65% Relative Humidity. It is not designed for operation in wet conditions without an additional conformal coating which must be approved and supplied by the manufacturer during the module build process or warrantee will be voided
